# Documentation for Billboard – the coming soon theme

We really appreciate that you bought our template. We hope that it will serve you well. If you like our template just let us know or you can stay in touch with us through facebook or twitter. It would be great if you recommended us to your friends and colleagues. If you have some questions just send a message we are looking forward to your emails.

Your **Pixelized** team

List of plugins

- **Vegas Background**
- **Creative Brands**
- **Time Circles (countdown)**

Vegas

Change your background

Vegas is plugin to set up a background with different types of overlays in our theme. You can find complete documentation here http://vegas.jaysalvat.com/documentation/background/.

To change background image you simply open folder "image" and paste your image here. Your image has to be in .jpg format and should be named „background".

If you have another image format go to folder "js" and open file "custom.js". In this file you have to change line number 10

```
src:'image/background.jpg'
```

Here you can edit image format. For example like this:

```
src:'image/background.png'
```

Choose your favourite overlay

Vegas plugin allows you to change different types of overlay. To do that you have to go to folder "js" open "custom.js" file and edit line number 15:

```
src:'plugins/vegas/overlays/01.png'
```

Vegas plugin has 15 different types so it's up to you which you choose e. g.

```
src:'plugins/vegas/overlays/13.png'
```

Creative Brands

It is css add-on more than plugin. This add-on edits appearance of logos social sites in the footer. For more http://brands.pixelized.cz/

Time Circles

Amazing plugin that allows us countdown with circle style. You can find complete documentation at http://git.wimbarelds.nl/TimeCircles/index.html

Set up time to countdown

To set up time to countdown you just have to open index.html in some editor.
Then on the line 218 set up your date. The format is yyyy-mm-dd.

```
210        <div class="row countdown"><!-- start of row countdown -->
211
212            <div class="col-md-12"><!-- Line Separator -->
213                <div class="line"><h3>How much longer</h3></div>
214                <div id="DateCountdown" data-date="2014-05-07 04:05:00"></div>
215            </div>
216
217        </div><!-- end of row countdown -->
```
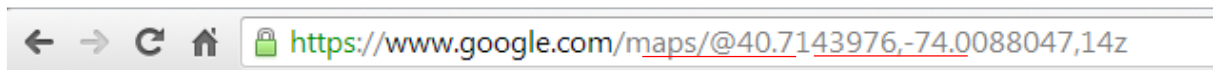

Google map

Change location in Google maps

To change location in Google maps leads several steps:

1. Open browser -> go to maps.google.com
2. Find location which you want show in your webpage
3. In the URL row of your browser copy the numbers after @ in this case "40.7143976,-74.0088047"

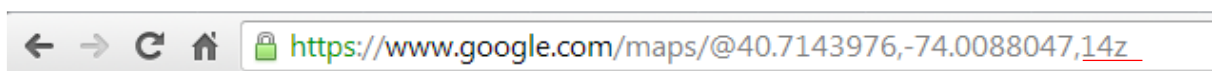

4. Now open "custom.js" in some editor and find line 59.

```
58    <!-- GOOGLE map initialization star-->
59        var myLatlng = new google.maps.LatLng(43.651071, -79.378764);
60        var mapOptions = {
61            zoom: 17,
62            center: myLatlng,
63            navigationControl: false,
64            mapTypeControl: false,
65            scaleControl: false,
66            draggable: true,
67            scrollwheel: false
68        }
```

5. On this line you can find some code and two red numbers this numbers replace by your own numbers

Change zoom

1. Open browser -> go to maps.google.com

2. Find location which you want to show in your webpage and set up zoom

3. In the URL row of your browser copy two last numbers in this case „14"

4. Now open "custom.js" in some editor and find line 61

5. On the start of this line you can find word "zoom". Delete default value and paste yours.
